6. Addendum 4 No.: KSPCB/717(Vol-6)/COC/2018/6935 dated: 30.03.2019
7. Recommendations of the Committee towards proposals received from Regional Offices in the meeting dated 10.12.2019
8. Addendum 5 No. : KSPCB/717(Vol.6)/COC/2019/5111 dated 21.12.2019
9. Addendum 6 No.: KSPCB/717(Vol.6)/COC/2019/915dated 29.06.2020
10. Recommendations of the Committee towards proposals received from Regional Office in the meeting dated 09.07.2020.
11. Addendum 7 No.: KSPCB/717(Vol.6)/COC/2020-21/1283dated 22.07.2020.
12. Addendum 8 No.: KSPCB/717(Vol.6)/COC/2020-21/1698dated 12.08.2020.
13. Recommendations of the Committee towards proposals received from Regional Office in the meeting dated 10.11.2020.
14. Letter from Regional Officer Peenya No. 884 Dated: 22.12.2020.
15. Recommendations of the Committee towards proposals received from Regional Office in the meeting dated 12.04.2021.

With reference to above subject, it is to be informed that, you have submitted letter on 24.08.2020 and 09.12.2020 stating that M/s. Maruthi Steels, Shed No: B141, 3rd Cross, Peenya Industrial Estate, Bangalore have submitted an application and stated that they are engaged in Collection of MS Metal and Boring Scrap of capacity 200 TPM. You have further stated that small quantity of fugitive emission is generated during loading & unloading, cutting, bailing activities. Further the coolant oil is also separated during the process which needs to be disposed as Hazardous waste for recycling/ incineration. You have also given weightage as per the CPCB Guidelines and it is 25 & 33.3 respectively hence recommended to consider this activity under Green Category.

In view of the Regional Officer recommendation, the subject was discussed in the committee meeting held on 12.04.2021, headed by Member Secretary constituted for change of category industries, which are not listed in the CPCB notification, but are operating in the respective states.

It was also deliberated that, in the earlier meeting held on 10.11.2020, it was discussed that under the Hazardous wastes (Management, Handling & Transboundary Movement) Rules 2016, the generator is required to dispose off the Hazardous and other waste as defined under the rules, to the actual user and also shall make entry in the passbook, before handing over the hazardous waste to the actual user is mandatory for other than disposal purpose. The collection, bailing does not come under the purview of 'Actual User' and the activity is in violation of the regulation. **Hence, it was resolved not to include such activity under the Categorization list.**

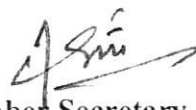

Hence you are informed not to consider MS Metal and Boring Scrap of capacity 200 TPM, under the consent mechanism, but to direct the authorities to handover the hazardous waste to authorized vendor with proper documentation and following the procedure.
