	Dr. Ravi D.R, EO, Head Office, KSPCB.	Convener

The Convener of the Committee has welcomed Chairman and Members including officers and requested the Chairman to occupy the chair and conduct the meeting.

I. Read & confirm the proceedings of the 176th CCM held on 06.02.2020:

The proceedings of the 176th CCM was read and confirmed with the following correction

CFO:176:414	M/s. Molex India Private Limited, Plot No: 6(A), Sadaramangala Industrial Area, Kadugodi, Bangalore- 560067.	Committee after detailed deliberations recommended to issue CFO-Expansion for the period upto 30.06.2021 with conditions.
-------------	--	---

Note: The following issues were discussed during the meeting.

- 1) During the meeting it is observed that the existing water meters provided in the apartments / commercial complex / industries are not efficient to measure the exact quantity of water consumed for different activities and hence cannot arrive at actual water balance. This also leading to excess usage of water than what is actually required. Hence the committee has opined to insist digital ultra sonic electro magnetic flow meter to all the residential apartments / commercial complexes. (Action to be taken – Infrastructure Cell).
- 2) It was also observed that the residential apartments /commercial complexes, while making application for obtaining CFE / CFO will not submit the details of Green belt development area and hence board cannot assess the quantity of treated water used onland for gardening within the premises. Hence, it is opined to get a autocad drawing indicating the exact area earmarked for green belt development within the premises. (Action to be taken – Infrastructure Cell).

18/2/2020

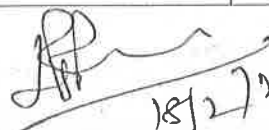

- 3) In case of infrastructure project, while issuing CFO /CFO-Expansion it is necessary to check the quality of treated sewage before taking any decision. Hence, the Committee has opined to mandate the latest analysis report of treated sewage. The Regional Officers shall submit the latest analysis report with specific inference on the treated water quality while forwarding the application. (Action to be taken – Infrastructure Cell).
- 4) It was observed that, the management of the Organic waste generated from the bulk generators is made mandatory. The technological options available for Organic waste management is organic waste converter or bio methanization plants. Many units have gone for organic waste converters. But there has been a resistance from the owners, as it requires continuous maintenance and it becomes a mess and at many places it has become a show piece. Henceforth it is recommended to set up the bio methanisation plants, which are operated in closed conditions, with no odor nuisance and also the gas generated from the plant can be used for either cooking / heating or for power generation. (Action to be taken – Infrastructure Cell).

II. Review of action taken on the proceedings of 175th CCM held on 13.01.2020.

The Action taken on the proceedings of 175th CCM were presented to the Committee and it was noted.

III. 177th CCM :-

Sl. No.	AGENDA NO.	SUBJECT	DECISION
SEO – INFRASTRUCTURE
