

EXECUTIVE SUMMARY

INTRODUCTION

Sri. Mohan D Hosamani has applied for TOR in order to prepare EIA report for grant of Environmental Clearance as per MoEF Notifications S.O. 1533(E) dated 14-09-2006 for extraction of Pink granite quarry having lease area of 5-16 Acres located in Survey no 9/1, Hirekodagali village Ilkal Taluk, Bagalkot District, Karnataka State.

As the total extent of cluster of all the projects inside the 500m buffer is having an extent greater than 5 Ha as per the Hon'ble NGT order dated 13th September 2018 and 11th December 2018 it is considered as "B1" category. The application to grant prior Environmental Clearance for the proposed project was considered by the KSEAC in its 267th SEAC meeting dated 29th September 2021. SEAC, Karnataka decided to recommend for grant of Terms of Reference (TOR) for preparing EIA/EMP report and conducting public consultation vide its letter no. SEIAA 491 MIN 2021 dated 06-12-2021.

Location of the Project

The Pink Granite Quarry with an extent of 5-16 Acres of mining lease area of located in Survey No. 9/1, Hirekodagali village Ilkal Taluk, Bagalkot District, Karnataka State:

PROJECT DESCRIPTION

Method of Mining

An open cast Other than fully Mechanized method will be adopted to operate the area. Since, the annual production is about 3,500 cum per annum (9,275 Tonnes per annum) for five years, the Open cast method will be followed during the plan period.

Anticipated life of the mine

It may be seen that during plan period, it is proposed to maintain a suitable Pink granite quarry production of about 3,500 cum per annum (9,275 Tonnes per annum) for 20 years.

Conceptual Mine Plan

Based on reserves of Pink granite quarry as Production capacity of 3,500 cum per annum Pink granite quarry for the 5 years plan period, thus the anticipated life of the quarry shall be 17 years.

Waste Generation & Disposal

Average of 19833 cu.m. per annum solid waste will be generated which will be disposed inside waste dump yard located east side project site over an extent of 0-02 Acres and will be used as building stone.

Water Requirement & Source

Total water requirement for the project will be 6.72 KLD, Requirement is met by procurement of water from the bore well nearby Tankers.

Manpower Requirement

The said mine provides direct employment to 16 people and generate 32 indirect employment for several hundred people. Most of the directly employed manpower falls under skilled category Preference will be given to the local people as per their eligibility.

Site Infrastructure

The Quarry will have its own office premises, canteen, first-aid center etc. Quarry office is well connected with wireless and telephone, internet & e-mail facilities for communication. The Quarry is provided with a workshop to undertake repairs and regular maintenance of mining machinery deployed.

EXISTING ENVIRONMENTAL SCENARIO

Baseline Environmental Studies

Meteorology & Ambient Air Quality

Summary of Meteorological data generated at site (March 2021 to June 2021)

Wind Direction	Frequency %
First Predominant Wind Direction	WSW
Second Predominant Wind Direction	SW
Calm conditions (%)	14.46

Lessee: Sri. Mohan D Hosamani

Ambient Air Quality Status

From the results, it is observed that the ambient air quality with respect to PM₁₀, PM_{2.5}, SO₂, and NO_x at all the monitoring locations is within the permissible limits specified by CPCB.

Ambient Noise Levels

Ambient noise level monitoring was carried out at the 9 monitoring locations, those were selected for ambient air quality monitoring. The monitoring results are within limits.

Biological Environment

There is no any Protected Areas like National Park or Wildlife Sanctuary were observed

Proposed Biological Environment Conservation Measures

- Thick Green belt will be developed around Quarry lease area and along transport road.
- Periodic maintenance of mineral transport road
- Regular sprinkling of water through mobile tanker on mineral transport road
- Mineral carrying trucks are loaded with only the stipulated quantity to avoid overloading and covered with tarpaulin to avoid spillage.

Socio-economic Environment

- There is no habitation or private land in the Pink granite Quarry. There is no rehabilitation and resettlement involved in the project.
- The said Quarry provides direct employment to 16 people and generate 32 indirect employment for several hundred people. Most of the directly employed manpower falls under skilled category and the respective distribution / numbers is follows. Preference will be given to the local people as per their eligibility.
- The existing infrastructure facilities are sufficient to cater the needs of the Pink granite Quarry. However, the Quarry management will take efforts as a part of CER for improvement in civic amenities like sanitation, drinking water facilities, transport road, etc. in the nearby villages.

ENVIRONMENTAL MONITORING PROGRAM

An Environmental Management Cell (EMC) will be established in the Quarry under the control of Mines Manager. The EMC will be headed by an Environmental Officer having adequate qualification and experience in the field of environmental management regular and periodic. Environmental monitoring of Ambient Air Quality, Water table depth, Water quality, Ambient Noise Levels, Soil Quality, CSR activities etc will be carried out through MOEF accredited agencies and reports will be submitted to KSPCB/ Regional office of MoEF&CC.

RISK ASSESSMENT & DISASTER MANAGEMENT PLAN

The assessment of risk in the Pink granite quarry Mining project has been estimated for Slope failure, Movement of HEMM, Inundation due to surface water, Dust hazards, Hazards associated

Lessee: Sri. Mohan D Hosamani

with use of Diesel Generator Sets and flooding of lower benches and corresponding mitigation measures are suggested in the EIA/EMP report.

PROJECT BENEFITS

The Pink granite quarry mining project would generate additional employment opportunities which would finally result in improvement in the quality of life of people of the nearby villages. In line with this CER policy, Sri. Mohan D Hosamani will carry out community welfare activities in the following areas:

- Community development
- Education
- Health care
- Drainage and sanitation
- Roads

A budget of Rs. 0.7 Lakh per annum as recurring expenses has been proposed for implementation of Socio-economic welfare activities in the nearby villages.

ENVIRONMENTAL MANAGEMENT PLAN

Judicious use of the environmental management plan addresses the components of environment, which are likely to be affected by the different operations in the project. The capital cost of the project is approx. Rs 184 Lakhs. It is proposed to provide an amount of Rs. 21.04 Lakh as capital cost and Rs 23.26 Lakhs per annum as recurring expenses towards implementation of the environmental action plan.

CONCLUSION

The Pink granite Quarry project of Sri. Mohan D Hosamani will be beneficial for the development of the nearby villages. Some environmental aspects like dust emission, noise, siltation due to surface run-off, etc. will have to be controlled within the permissible limit to avoid impacts on the surrounding environment. Necessary pollution control equipment like water sprinkling, plantation, personal protective equipment's, etc., will form regular practice in the project. Additional pollution control measures and environmental conservation measures will be adopted to control/minimize impacts on the environment and socio-economic environment of the area. Measures like development of thick green belt and plantation within quarry lease area and along transport road, adoption of rainwater harvesting in the quarry etc. will be implemented. The CSR measures proposed to be adopted by the quarry management will improve the social, economic status of the nearby villages.

The overall impacts of the Pink granite quarry will be positive and will result in overall socio-economic growth of nearby villages.
